Optional home exam 'Requirements in agile development', spring 2021, Uppsala University

1. What are the main reasons for using the 'master-apprentice' approach when studying work practices? Describe comprehensibly, but to the point, and ground your arguments in results from psychology, as discussed during the lectures, as well as from the book by Beyer. (10p)

2. According to available statistics, problems with (large scale) development of software for professional use are still present today. Projects are often not completed on time, on budget and more than occasionally don't bring the intended benefits to end users in terms of increased efficiency. Discuss in what way agile development can and/or cannot tackle these problems. (10p)

Please note that all text you submit should be written by you or else be clearly marked using quotation marks and the source quoted. Please also note that cooperation between students is not allowed. This is a strictly individual exam.

All answers should be given in English. The submitted document should be in the form of a pdf.

Please do NOT forget to mark the front page with your name and p-number!

Maximum number of points = 20

Grade criteria: points > 16 = '5'; 12 >= points <= 16 = '4'
